City of Riverside Addendum to Purchasing Policies and Procedures

In compliance with Uniform Grant Guidance in Title 2 Code of Federal Regulation (C.F.R.) Grants and Agreements, Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, it is the policy of The City of Riverside to adhere to these requirements. For procurement, all non-Federal entities must follow 2 CFR Part 200 Subpart D Subsections §200.318 General procurement standards through §200.326, and Appendix II to Part 200-Contract Provisions for Non-Federal Entity Contracts Under Federal Awards. These standards are accessible online at:
https://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title02/2cfr200_main_02.tpl

2 CFR §200.318 General procurement standards

(a) The non-Federal entity must use its own documented procurement procedures which reflect applicable State, local, and tribal laws and regulations, provided that the procurements conform to applicable Federal law and standards. Where State and/or local requirements conflict with Federal requirements, the strictest requirement, will be followed.

This policy establishes procedures for procurement of goods and services, lists and explains relevant Federal laws and policies regarding procurement for Federal grant administration. Failure to follow policies regarding Federal requirements may result in a wide range of sanctions including disallowed costs, denied reimbursement requests, recoupment of funds, and debarment/exclusion from Federal funding. Violation of this policy may result in disciplinary action, including termination of the federal grant.

2 CFR 180 Debarment and suspension

OMB Guidelines to Agencies on Government wide Debarment and Suspension govern debarment and suspension. These regulations restrict awards, sub-awards, and contracts with certain parties that are debarred, suspended, or otherwise excluded from, or ineligible for participation in Federal assistance programs or activities. It is a requirement to check for suspended or debarred parties before awarding work for all covered transactions. Debarred or suspended parties may be found by searching the System for Award Management (SAM) for exclusion records, active or excluded at www.sam.gov documentation of the results of searches must be retained with procurement and grant records.

STANDARDS OF CONDUCT AND CONFLICT OF INTEREST

§200.318 General procurement standards

2 CFR Part 200, Subpart D Subsection §200.318 (c)(1)

The non-Federal entity must maintain written standards of conduct covering conflicts of interest and governing the actions of its employees engaged in the selection, award and administration of contracts. No employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a Federal award if he or she has a real or apparent conflict of interest. Such a conflict of interest would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or other interest in or a tangible personal benefit from a firm considered for a contract. The officers, employees, and agents of the non-Federal entity may neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or parties to subcontracts. However, non-Federal entities may set standards for situations in which the financial interest is not substantial or the gift is an unsolicited item of nominal value. The standards of conduct must provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the non-Federal entity.

COUNCIL PACKET

(2) If the non-Federal entity has a parent, affiliate, or subsidiary organization that is not a state, local government, or Indian tribe, the non-Federal entity must also maintain written standards of conduct covering organizational conflicts of interest. Organizational conflicts of interest means that because of relationships with a parent company, affiliate, or subsidiary organization, the non-Federal entity is unable or appears to be unable to be impartial in conducting a procurement action involving a related organization.

§200.319 Competition.

(a) All procurement transactions must be conducted in a manner providing full and open competition consistent with the standards of this section. In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, or invitations for bids or requests for proposals must be excluded from competing for such procurements.

(b) The non-Federal entity must conduct procurements in a manner that prohibits the use of statutorily or administratively imposed state, local, or tribal geographical preferences in the evaluation of bids or proposals, except in those cases where applicable Federal statutes expressly mandate or encourage geographic preference. Nothing in this section preempts state licensing laws. When contracting for architectural and engineering (A/E) services, geographic location may be a selection criterion provided its application leaves an appropriate number of qualified firms, given the nature and size of the project, to compete for the contract.

(c) The non-Federal entity must have written procedures for procurement transactions. These procedures must ensure that all solicitations:

(1) Incorporate a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description must not, in competitive procurements, contain features which unduly restrict competition. The description may include a statement of the qualitative nature of the material, product or service to be procured and, when necessary, must set forth those minimum essential characteristics and standards to which it must conform if it is to satisfy its intended use. Detailed product specifications should be avoided if at all possible. When it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a "brand name or equivalent" description may be used as a means to define the performance or other salient requirements of procurement. The specific features of the named brand which must be met by offers must be clearly stated; and

(2) Identify all requirements which the offerors must fulfill and all other factors to be used in evaluating bids or proposals.

(d) The non-Federal entity must ensure that all prequalified lists of persons, firms, or products which are used in acquiring goods and services are current and include enough qualified sources to ensure maximum open and free competition. Also, the non-Federal entity must not preclude potential bidders from qualifying during the solicitation period.

§200.320 Methods of procurement to be followed

(a) Procurement by micro-purchases. Procurement by micro-purchase is the acquisition of supplies or services, the aggregate dollar amount of which does not exceed the micro-purchase threshold (§200.67 Micro-purchase). To the extent practicable, the non-Federal entity must distribute micro-purchases equitably among qualified suppliers. Micro-purchases may be awarded without soliciting competitive quotations if the non-Federal entity considers the price to be reasonable.

(b) Procurement by small purchase procedures. Small purchase procedures are those relatively simple and informal procurement methods for securing services, supplies, or other property that do not cost more than the Simplified Acquisition Threshold. If small purchase procedures are used, price or rate quotations must be obtained from an adequate number of qualified sources.

COUNCIL PACKET

(c) Procurement by sealed bids (formal advertising). Bids are publicly solicited and a firm fixed price contract (lump sum or unit price) is awarded to the responsible bidder whose bid, conforming with all the material terms and conditions of the invitation for bids, is the lowest in price. The sealed bid method is the preferred method for procuring construction, if the conditions in paragraph (c)(1) of this section apply.

(1) In order for sealed bidding to be feasible, the following conditions should be present:

(i) A complete, adequate, and realistic specification or purchase description is available;
(ii) Two or more responsible bidders are willing and able to compete effectively for the business;
and

(iii) The procurement lends itself to a firm fixed price contract and the selection of the successful bidder can be made principally on the basis of price.

(2) If sealed bids are used, the following requirements apply:

(i) Bids must be solicited from an adequate number of known suppliers, providing them sufficient response time prior to the date set for opening the bids, for state, local, and tribal governments, the invitation for bids must be publically advertised;

(ii) The invitation for bids, which will include any specifications and pertinent attachments, must define the items or services in order for the bidder to properly respond;

(iii) All bids will be opened at the time and place prescribed in the invitation for bids, and for local and tribal governments, the bids must be opened publicly;

(iv) A firm fixed price contract award will be made in writing to the lowest responsive and responsible bidder. Where specified in bidding documents, factors such as discounts, transportation cost, and life cycle costs must be considered in determining which bid is lowest. Payment discounts will only be used to determine the low bid when prior experience indicates that such discounts are usually taken advantage of; and

(v) Any or all bids may be rejected if there is a sound documented reason.

(d) Procurement by competitive proposals. The technique of competitive proposals is normally conducted with more than one source submitting an offer, and either a fixed price or cost-reimbursement type contract is awarded. It is generally used when conditions are not appropriate for the use of sealed bids. If this method is used, the following requirements apply:

(1) Requests for proposals must be publicized and identify all evaluation factors and their relative importance. Any response to publicized requests for proposals must be considered to the maximum extent practical;

(2) Proposals must be solicited from an adequate number of qualified sources;

(3) The non-Federal entity must have a written method for conducting technical evaluations of the proposals received and for selecting recipients;

(4) Contracts must be awarded to the responsible firm whose proposal is most advantageous to the program, with price and other factors considered; and

(5) The non-Federal entity may use competitive proposal procedures for qualifications-based procurement of architectural/engineering (A/E) professional services whereby competitors' qualifications are evaluated and the most qualified competitor is selected, subject to negotiation of fair and reasonable compensation. The method, where price is not used as a selection factor, can only be used in procurement of A/E professional services. It cannot be used to purchase other types of services though A/E firms are a potential source to perform the proposed effort.

(e) Procurement by noncompetitive proposals. Procurement by noncompetitive proposals is procurement through solicitation of a proposal from only one source and may be used only when one or more of the following circumstances apply:

(1) The item is available only from a single source;

COUNCIL PACKET

- (2) The public exigency or emergency for the requirement will not permit a delay resulting from competitive solicitation;
- (3) The Federal awarding agency or pass-through entity expressly authorizes noncompetitive proposals in response to a written request from the non-Federal entity; or
- (4) After solicitation of a number of sources, competition is determined inadequate.

§200.321 Contracting with small and minority businesses, women's business enterprises, and labor surplus area firms.

(a) The non-Federal entity must take all necessary affirmative steps to assure that minority businesses, women's business enterprises, and labor surplus area firms are used when possible.

(b) Affirmative steps must include:

- (1) Placing qualified small and minority businesses and women's business enterprises on solicitation lists;
- (2) Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;
- (3) Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;
- (4) Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises;
- (5) Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce; and
- (6) Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs (1) through (5)

§200.322 Procurement of recovered materials

A non-Federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act.

§200.323 Contract cost and price

The cost plus a percentage of cost and percentage of construction cost method of contracting shall not be used.

(a) A cost/price analysis must be performed in connection with every procurement action in excess of the Simplified Acquisition Threshold including contract modifications

The method and degree of analysis is dependent on the facts surrounding the particular procurement situation, but as a starting point, the non-Federal entity must make independent estimates before receiving bids or proposals.

(b) The non-Federal entity must negotiate profit as a separate element of the price for each contract in which there is no price competition and in all cases where cost analysis is performed. To establish a fair and reasonable profit, consideration must be given to the complexity of the work to be performed, the risk borne by the contractor, the contractor's investment, the amount of subcontracting, the quality of its record of past performance, and industry profit rates in the surrounding geographical area for similar work.

(c) Costs or prices based on estimated costs for contracts under the Federal award are allowable only to the extent that costs incurred or cost estimates included in negotiated prices would be allowable for the non-Federal entity under Subpart E—Cost Principles of this part. The non-Federal entity may reference its own cost principles that comply with the Federal cost principles.

COUNCIL PACKET

§200.324 Federal awarding agency or pass-through entity review

(a) The non-Federal entity must make available, upon request of the Federal awarding agency or pass-through entity, technical specifications on proposed procurements where the Federal awarding agency or pass-through entity believes such review is needed to ensure that the item or service specified is the one being proposed for acquisition.

(b) The non-Federal entity must make available upon request, for the Federal awarding agency or pass-through entity pre-procurement review, procurement documents, such as requests for proposals or invitations for bids, or independent cost estimates, when:

(1) The non-Federal entity's procurement procedures or operation fails to comply with the procurement standards in this part;

(2) The procurement is expected to exceed the Simplified Acquisition Threshold and is to be awarded without competition or only one bid or offer is received in response to a solicitation;

(3) The procurement, which is expected to exceed the Simplified Acquisition Threshold, specifies a "brand name" product;

(4) The proposed contract is more than the Simplified Acquisition Threshold and is to be awarded to other than the apparent low bidder under a sealed bid procurement; or

(5) A proposed contract modification changes the scope of a contract or increases the contract amount by more than the Simplified Acquisition Threshold.

(c) The non-Federal entity is exempt from the pre-procurement review in paragraph (b) of this section if the Federal awarding agency or pass-through entity determines that its procurement systems comply with the standards of this part.

§200.325 Bonding requirements

For construction or facility improvement contracts or subcontracts exceeding the Simplified Acquisition Threshold, the Federal awarding agency or pass-through entity may accept the bonding policy and requirements of the non-Federal entity provided that the Federal awarding agency or pass-through entity has made a determination that the Federal interest is adequately protected. If such a determination has not been made, the minimum requirements must be as follows:

(a) A bid guarantee from each bidder equivalent to five percent of the bid price. The "bid guarantee" must consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder will, upon acceptance of the bid, execute such contractual documents as may be required within the time specified.

(b) A performance bond on the part of the contractor for 100 percent of the contract price. A "performance bond" is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

(c) A payment bond on the part of the contractor for 100 percent of the contract price. A "payment bond" is one executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of the work provided for in the contract.

§200.326 Contract provisions.

The non-Federal entity's contracts must contain the applicable provisions described in Appendix II to Part 200—Contract Provisions for non-Federal Entity Contracts Under Federal Awards.

Cost Principles

Cost principles must govern how NON-FEDERAL ENTITIES spend Federal grant funding. Federal cost principles are found in 2 CFR Part 200 Subpart E, accessible online at [2 CFR PART 200 SUBPART E](#).

Personally Identifiable Information and Protected Personally Identifiable Information Requirements Applicable to all Federal Awards

In compliance with Uniform Grant Guidance in Title 2 Code of Federal Regulation (C.F.R.) Grants and Agreements, Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, it is the policy of: CITY of RIVERSIDE, IOWA to protect Personally Identifiable Information (PII) of employees, customers, vendors, contractors, volunteers, etc. The electronic restrictions and safeguards outlined in 2 C.F.R. 200.79 Personally Identifiable Information, and 200.82 Protected Personally Identifiable Information (PPII), along with 2 C.F.R 200.303 Internal Controls, this policy provides guidance for employees, volunteers, agents, etc. with access to PII and PPII.

Personally Identifiable Information (2 C.F.R. 200.79) is any information pertaining to an individual that can be used to distinguish or trace a person's identity. Some information that is considered PII is available in public sources such as telephone books, public websites, etc. This type of information is considered to be Public PII and includes:

1. First and Last name
2. Address
3. Work telephone number
4. Work e-mail address
5. Home telephone number
6. General educational credentials
7. Photos and video

The definition of PII is not anchored to any single category of information or technology. Rather, it requires a case-by-case assessment of the specific risk that an individual can be identified. Non-PII can become PII whenever additional information is made publicly available, in any medium and from any source, that, when combined with other available information, could be used to identify an individual.

Protected PII (2 C.F.R. 200.82) means an individual's first name or first initial and last name in combination with any one or more of types of information, including, but not limited to:

1. Social security number
2. Username and password
3. Passport number
4. Credit card number
5. Clearances
6. Banking information
7. Biometrics
8. Data and place of birth
9. Mother's maiden name
10. Criminal, medical and financial records
11. Educational transcripts
12. Photos and video including any of the above

This does not include PII that is required by law, statute, or regulation to be disclosed, such as a law enforcement or court order right to know.

Internal controls (2 C.F.R. 200.303)

The non-Federal entity must:

(e) Take reasonable measures to safeguard protected personally identifiable information and other information the Federal awarding agency or pass-through entity designates as sensitive or the non-Federal entity considers sensitive consistent with applicable Federal, state, local, and tribal laws regarding privacy and obligations of confidentiality.

Personally Identifiable Information and Protected Personally Identifiable Information Requirements Applicable to all Federal Awards

Procedures

Guidelines on how to maintain and discard PII. All electronic files that contain Protected PII will reside within a protected information system location. All physical files that contain Protected PII will reside within a locked/secured/monitored location when not being actively viewed or modified. Protected PII is not to be downloaded, without prior approval, to personal or organization owned employee workstations or mobile devices (such as laptops, personal digital assistants, mobile phones, tablets or removable media). PII will also not be sent through any form of insecure electronic communication e.g. e-mail or instant messaging systems. Significant security risks emerge when PII is transferred from a secure location to a less secure location or is disposed of improperly. When disposing of PII the physical or electronic file should be shredded, securely deleted, or disposed of by a means that renders the information unrecognizable and beyond reconstruction.

Incident Reporting

RIVERSIDE CITY ADMINISTRATOR must be informed of a real or suspected disclosure or breach of Protected PII data within 24 hours after discovery. Examples: misplacing a paper report, loss of a laptop, mobile device, or removable media containing PII, accidental email of PII, possible virus, or malware infection or a computer containing PII.

Audits

Periodic audits of organization owned equipment and physical locations may be performed to ensure that protected PII is stored in approved information systems or locations. The purpose of the audit is to ensure compliance with this policy and to provide information necessary to continuously improve practices.

Enforcement

Anyone found to be in violation of this policy may be subject to disciplinary action as deemed appropriate based on the facts and circumstances giving rise to the violation.

Records Disposal

Records containing personal data are to be disposed of so as to prevent inadvertent compromise of data and will use a disposal method that will render all personal data unrecognizable and beyond reconstruction.

136.02 DEFINITIONS. For use in this chapter the following terms are defined:

1. "Broom finish" means a sidewalk finish that is made by sweeping the sidewalk when it is hardening.
2. "Defective sidewalk" means any public sidewalk exhibiting one or more of the following characteristics:

If this has not been done within twenty-four (24) hours, notice will be posted on the door of the address and 24 hours later the City will have the snow removed at the rate of fifty cents (50¢) per linear foot of sidewalk. The property owner will be mailed a bill from the City to be paid within thirty (30) days of receipt. Any bills left unpaid will become a lien against the property in the following spring after all snowfall.
